Question:	What did you think were the best things about this course?	
Response Rate:	72.73% (8 of 11)	
1	the way he easily helped us know what would be needed on exams	
2	the organization	
3	The learning experience	
4	The labs were my favorite part.	
5	The best thing about this course was getting a credit in 4 weeks	
6	Learning more about the human body and the components it is made up of and how and why they work in certain ways was just so interesting.	
7	Doing labs	
8	Despite it being an extremely condensed course, Dr. Nwachukwu made it extremely feasible to complete this course. Without his understanding and caring nature, this course would have been a nightmare.	

Question:	What were the course's weaknesses and areas in need of improvement?	
Response Rate:	72.73% (8 of 11)	

1	the explanations of some things were confusing	
2	shorter classes; shouldnt be a summer class	
3	more dissection labs would be helpful	
4	The only downside of this course was the condensing of 16 weeks to 4 weeks. Although we did not get the full experience it was still something my peers and I will not forget	
5	None	
6	I wish there was like a pre quiz review to get you ready for the daily quizzes.	
7	Courses weakness itself was the amount of information given per day, difficult to obtain with little to no practice other than homework assignments.	
8	An impossible amount of info in an impossible amount of time. I studied 10 hrs a day.	

<b>Question:</b>	<b>Positive aspects of the facilities (classroom arrangements, computer hardware/software/support, etc.):</b>	
<b>Response Rate:</b>	<b>54.55% (6 of 11)</b>	
1	very nice all around	
2	good facility	
3	The classroom was wide and very roomy. Not to crowded.	
4	Lab was clean and modern, software up to date, no "connection" issues	
5	Everything	
6	College of the Mainland has done an amazing job at upgrading its learning facilities which really helped during the summer semester and the class's overall condensed nature	

<b>Question:</b>	<b>Negative aspects of the facilities (classroom arrangements, computer hardware/software/support, etc.):</b>	
<b>Response Rate:</b>	<b>63.64% (7 of 11)</b>	
1	none	
2	lab policy in clothing on non lab days lol	
3	class room is extremely cold have to wear a jacket even if its summer time	
4	The room was sometimes very cold.	
5	None	
6	N/A	
7	Chairs are awful and not ergonomic no matter how you adjust them, also freezing cold to a point where I could not focus on the information being given	

<b>Question:</b>	<b>Please add any additional comments you may have about this course:</b>	
<b>Response Rate:</b>	<b>45.45% (5 of 11)</b>	
1	thanks professor raymond!	
2	such a nice professor	
3	This course is doable but will require willpower to do it. Dr. Nwachukwu is a great professor to take for this course and I highly recommend him if you decide to take it during the normal 16-week semester	

4	<p>Dr. Raymond was great, he explained things as thoroughly as I felt he could within the time given and also related information to his own life experiences which was intriguing for me and helped me create memories that would connect the topics. I also appreciate his rationality; taking a 4 week science is difficult, our class had come together a couple times, hesitant to ask for more time to prepare before a quiz and he willing to work with us every time. Very evident he cares about his students and their success!</p>	
5	<p>A lot of sacrifices are needed to take this course in only 5 weeks. I would also share with others considering taking this course is very time consuming and has to be your number one priority</p>
