Question:	What did you think were the best things about this course?
Response Rate:	72.22%　(**13** of **18**)

1	the professor you can tell loves what he does and he is funny and super sweet
2	it being a summer course
3	his teaching style
4	The professor
5	The labs, I enjoyed the hands on aspects
6	The information I learned
7	The homework load wasn't too much
8	The best things about this course was the lively, interactive teaching style of the professor.
9	The Professor! He made the class very interesting for me. He shared stories and made jokes that made it easier for me to process and remember the information in class. He's a very sweet and knowledgeable person.
10	Professor Mubiru was an outstanding teacher, his energy and enthusiasm was infectious and every day was an enjoyable learning environment.

11	I appreciate Mubiru's art of teaching in which he story tells and uses examples and humor to help you remember the subject matter. He is repetitive and makes sure he states important material over and over again in order for you to remember.	🔍
12	How the professor was always so nice to his students and would give us group talks	🔍
13	He was very involved with each and every student.	🔍

Question:	What were the course's weaknesses and areas in need of improvement?
Response Rate:	72.22% (13 of 18)

1	there are non	🔍
2	none	🔍
3	na	🔍
4	n/a	🔍
5	There were none	🔍
6	Summer course- everything was rushed. Professor- MEN get just as many infections as women. Women/females/ girls mainly used as examples for std's, Sti's, candida infections- males are JUST as susceptible to getting these. Respectfully.	🔍
7	Professor really stuck to the PowerPoint when teaching instead of using other examples. Kind of difficult to understand as well if you weren't use to his accent but you begin to catch on around week 3-4	🔍
8	Nothing	🔍
9	None	🔍
10	N/a	🔍
11	Moved a little too fast sometimes, but it is a summer course that has to cover a lot of material.	🔍
12	I will say the course outline/syllabus and or assignments via blackboard are not spot on with correct dates. This is very crucial to the student and means a great deal when material expectations are organized in a correct manner. Many dates were wrong/old and needed to be updated. Multiple duplicated PowerPoints were uploaded at a time thus making it confusing. Assignments sometimes stated they needed to be uploaded but then Mubiru would accept them in class. Please work better to update all technical discrepancies like this and the student will feel more secure and know that they are on the right track.	🔍
13	He is very unorganized in the labs and moves too fast to understand what is happening.	🔍

Question:	Positive aspects of the facilities (classroom arrangements, computer hardware/software/support, etc.):

8	Everything	🔍
9	Definitely the Professor. He made learning in his class fun and enjoyable. I'd definitely recommend him to other students. I really wish I had taken him for Anatomy and Physiology too.	🔍
10	Classroom had outlets for laptop charging and other things such as that	🔍
