

PHYS-2426-102C3 University Physics II Fall 2025 8:00 am to 10:50 am Monday, Wednesday

INSTRUCTOR INFORMATION:

Instructor: Dr. Suleyman Tari E-mail: stari@com.edu

Phone: 409-933-8816 (office) / 773-368-3921 (cell)

OFFICE HOURS AND LOCATION:

Monday: 5:00 pm-6:00 pm, office S325-21 Tuesday: 8:00 am-9:30 am, office S325-21 Wednesday: 5:00 pm-6:00 pm, office S325/21

Thursday: 4:00 pm-8:00 pm virtual

REQUIRED TEXTBOOK/MATERIALS:

- "Physics for Scientist and Engineers", 6th edition, published by Macmillan Learning, Paul A. Tipler.
- The "Physics II Lab Manual" can be purchased from the College Book Store.
- Achieve Learning Access code for the University physics e book and online resources.
- You have automatic access to the book and Achieve online resources when you register for the class.

COURSE DESCRIPTION:

- University Physics II (PHYS-2426) covers principles of sound and light, electricity and magnetism, some relativity and quantum physics. Prerequisite: MATH-2414 and PHYS-2425.or approval of the instructor.
- The laboratory is an integrated component of the course whose function is to aid the student in achieving an understanding of physics.
- University Physics satisfies the physics requirements for physics majors and engineering students seeking a baccalaureate degree.

COURSE REQUIREMENTS:

Exams

- There will be three midterm exams (written non-cumulative) and a final exam (multiple choice, cumulative).
- Midterm exams will be given in classroom S302, and a final exam will be online using Achieve or (Desire to Learn) D2L.
- Exams questions consist of problems that need to be solved.
- A formula sheet may be provided in the exams.
- Midterm exams will last 2 hours, and the final exam will last 3 hours.
- There are **NO** make-up exams (except emergencies, proof must be provided) so please make every effort not to miss a test.

Laboratory

This course consists of both a lecture and laboratory grade component. Students must earn 70% or better in the laboratory component to successfully pass the course. Earning less than 70% in the laboratory component will result in an F for the course regardless of the lecture grade. Passing the laboratory component and failing the lecture component will not guarantee a passing grade for the course. Deviations from this policy will be at the sole discretion of the instructor.

- Students are required to perform lab work in classroom at COM campus and complete the "Lab Homework" online using D2L.
- Students must pass the lab to pass the course.
- There is no make-up lab because of scheduling problems unless in case of emergencies (prove must be submitted).
- If you miss **only one lab** (with a valid excuse, i.e., emergence, sickness proof must be submitted), that lab will be dropped as the lowest grade.
- If you miss a lab for the second time (no excuse accepted), you will have a grade of zero for that lab.
- If you miss a lab for the third time you may fail the class.
- Lab grading is:
 - Performing the lab and completing lab manual in classroom (50 %)

- Complete Lab HW on D2L (50%).
- You cannot get a grade for the Lab HW if you do not perform in the lab in class.

Pre-Lecture Assignment (Online Achieve)

- Before each chapter, there will be a pre-lecture assignment. Pre-lecture assignment consists of lecture videos, and Bridge questions.
- Pre-lecture assignments must be completed before class time. There is no extension for pre-lecture assignments.

Homework Assignment (Online Achieve)

- After each chapter, there will be a Homework consisting of 5 to 10 questions.
- Homework will consist of conceptual questions and problems where you need to use some math to solve.
- Homework has deadlines and must be completed in time.
- Homework does not have a time limit; however, it must be completed before the due date.

Quiz (Online Achieve)

- After each chapter, there will be a Quiz consisting of about 5 questions.
- Each quiz consists of questions where you need to use some math to solve.
- Quizzes are timed, please complete the quiz once you start doing it.
- Quizzes must be completed before the due date.

Methods of Instruction: In person at COM campus.

- Pre-Lectures, visual presentations of specific course objectives, demonstrations of various physics concepts in class when appropriate, and laboratory experiments.
- Class notes will be on D2L.
- Pre-Lecture, Homework, and Quizzes will be done using Achieve)
- Lab homework will be done using D2L.

DETERMINATION OF COURSE GRADE/DETAILED GRADING FORMULA:

The details of how each item will be added to your final total are shown in the following chart.

Type of Assessment	% of the FINAL grade
Three Midterm Exams	15+15+15
Pre-Lecture Achieve	10
Homework Achieve	10
Lab (in class) + Lab HW (D2L)	20
Final Exam	15
Total	100
Percentage	Letter Grade
90 – 100%	A
80 – 89%	В
70 – 79%	С
60 – 69%	D
0 - 59%	F

LATE WORK, MAKE-UP, AND EXTRA-CREDIT POLICY:

Late work and make-up policy

- All assignments must be completed before the due date. Extension for any assignment may be granted in case of emergencies prove must be submitted.
- Make up for exams and laboratories may be granted in case of emergencies, proof must be submitted.

Extra Credit

Class activity: You may get extra credit (point) answering and/or solving questions during the class.

- %5 of extra points earned from class activity will be added to your final grade.
- The maximum extra credit can be earned in one semester from class activity is 5% (5 points) out of 100 points.
- If you earn more than 100 points in a semester you still get a maximum of 5 points.

Instructor evaluation:

You may get up to 50 points extra credit as an "instructor evaluation" during the class to be added to the class
activity (towards 100 points) mentioned above. This will be based on class participation, class interaction,
being on time in class etc. Please do not expect this credit, not everyone may get this credit. Please do not ask
the professor to receive this credit at the end of the semester.

ATTENDANCE POLICY:

Lecture:

You are expected to attend all the lectures.

Attendance is 5% of your total grade.

Missing lectures may affect your all over class performance.

Please let your professor know whether you will be missing the class.

You can attend the class when you can make it in case you are late without disturbing the class.

Laboratories:

Given the hands-on nature of the laboratory, participation in this portion of the course is crucial. A student must successfully complete 75% (9 out of 12 labs) of all laboratory assignments to pass the laboratory portion. Failure to complete 75% of the laboratory assignments may result in a failing laboratory grade and a failing grade for the course. Documented excused absences (i.e., death in the family or a documented illness) will be handled on a case-by-case bases and at the discretion of the instructor.

Lab attendance: Please be present for the lab at the beginning of the class time. Every minute you are late for the lab will decrease your grade as percentage accordingly. For example: if you are late for 15 min, your lab part of the grade will be reduced by %15. To get full credit for the lab part you must be in the classroom on time, sharp 8:00 am. You must let me know if you are going to be late. Late cases (If emergency exists) will be handled case by case.

COMMUNICATING WITH YOUR INSTRUCTOR: ALL electronic communication with the instructor must be through your COM email. Due to FERPA restrictions, faculty cannot share any information about performance in the class through other electronic means. (Faculty may add additional statement requiring monitoring and communication expectations via D2L or other LMS)

STUDENT LEARNER OUTCOMES:

Upon successful completion of this course, students will successfully demonstrate mastery of the Student Learner Outcomes listed below.

Student Learner Outcome	Maps to Core Objective	Assessed via this Assignment
1.Develop techniques to set up and perform experiments, collect data from those experiments, and formulate conclusions from an experiment.		Lab 2
2. Demonstrate the collection, analysis, and reporting of data using the scientific method.	Critical Thinking Skills. Students will demonstrate creative thinking, innovation, and the ability to analyze, evaluate, and synthesize information.	Lab 4. Locations where electric potential has specified values are determined and recorded. Data is analyzed to determine the relationship between position and potential, results are reported in writing.
3. Record experimental work completely and accurately in laboratory notebooks and communicate experimental results clearly in written reports.	Written Communication Skills. Develop, interpret, and express ideas through written communication.	Lab 3. Electric circuits are built and current measured. Drawings of circuits and results of measurements are recorded in laboratory notebooks. Written report includes discussion of circuits and measurements.
4. Solve problems involving the interrelationship of fundamental charged particles, and electrical forces, fields, and currents.		Electric Force Module
5. Apply Kirchhoff's Rules to analysis of circuits with potential sources, capacitance, inductance, and resistance, including parallel and series capacitance and resistance.	Empirical and Quantitative Skills. Manipulate and analyze observable facts, evidence, or numerical data and arrive at an informed conclusion.	Lab 7. Circuits are created and voltage and current measured. Kirchhoff's Rules are used to calculate the values of voltage. Results are compared to measured values.
6. Solve problems in the electrostatic interaction of point		Electrostatics Module

charges through the application of		
Coulomb's Law.		
7. Solve problems involving the		Lab 10
effects of magnetic fields on moving		
charges or currents, and the		
relationship of magnetic fields to the		
currents which produce them.		
8. Use Faraday's and Lenz's laws to		Electromagnetism Module
determine electromotive forces and		
solve problems involving		
electromagnetic induction.		
9. Solve problems applying the		Lab 12.
principles of reflection, refraction,		
diffraction, interference, and		
superposition of waves.		
10. Solve practical problems		Lab 11
involving optics, lenses, mirrors, and		
optical instruments.		
11. Articulate the principles of		Lab 12
reflection, refraction, diffraction,		
interference, and superposition of		
waves.		
12. Describe the characteristics of		Electromagnetic Spectrum Module
light and the electromagnetic		
spectrum.		
13. Teamwork. Demonstrate the	Teamwork	Lab 1. Teams will devise methods of moving
ability to work effectively with others		bobs on springs in ways needed to create
to support and accomplish a shared		prescribed motion and force graphs.
goal, while recognizing and		
respecting different viewpoints.		
·		

ACADEMIC DISHONESTY:

- College of the Mainland is committed to a high standard of academic integrity. In becoming a part of the academic
 community, students are responsible for honesty and independent effort. Incidents of academic and scholastic
 dishonesty (including cheating, plagiarism, and collusion) will be dealt with in a manner consistent with College
 Policy and the Student Handbook.
- Violations may result in a penalty. The maximum penalty will be a grade of "F" for the course. Violations may also be reported to the Judicial Coordinator as instances of *Inappropriate Behavior*. Please see the section on Privileges and Obligations in the Student Handbook for a more complete discussion of *Inappropriate Behavior*, and of your rights and responsibilities.
- There are many situations where you will be required to submit written work to earn points. It is important that the work you submit be your own. You cannot copy the work of another, or have your work copied by another. Doing so will be considered a violation of Academic Honesty.
- The work that you submit must be a product of your own mind. When completing assignments, for example, you are encouraged to collaborate with others to try to come to an understanding. But when you set pen to paper to write your answer, what you write must be a product of your own mind. When identical, or nearly identical, writings are submitted by students, it will lead me to suspect that work was copied. You could then be in violation of the standards of academic honesty, as described above.

STUDENT CONCERNS:

If you have any questions or concerns about any aspect of this course, please contact me using the contact information previously provided. If, after discussing your concern with me, you continue to have questions, please contact the department chairperson, Professor Sheena Abernathy, either in person, by telephone at 409-933-8330, or by email at sabernathy@com.edu

COURSE OULINE:

Phys 2426-102C3 University Physics II –Tentative Course Schedule

Wee k		Date	Physics for Scientists and Engineers, 6 ed, chapters covered	Laboratories at S302 Wednesdays
1	Aug	18	Introduction and Review of vectors.	
		20	Ch 14. Oscillations	No lab but lecture
2			Ch 15. Waves and sound	Lab 1. Periodic Motion
			Lab 1 and Lab 2	Lab 2. Standing waves
3	Sep		No Class Labor Day	-
			Ch 21. The Electric Field I: Disc. Charge Dist.	No lab but lecture
4			Ch 22. The Electric Field II: Cont. Charge Dist.	-
			Ch 22. The Electric Field II: Gauss Law	No lab but lecture
5			Ch 23. Electric Potential	-
			Lab 3	Lab 3. Batteries, Bulbs & Cur.
6			Exam 1: Ch 14, 15, 21, 22, 23 included.	-
			Lab 4	Lab 4. Electric Potential
7	Sep		Ch 24. Capacitance: Stored electrical energy	-
	Oct		Lab 5	Lab 5. Current in Simple DC Cir.
8			Ch 25. Electric Current and DC Circuits	Lob 6 Voltage in Simple DC Cir
			Lab 6	Lab 6. Voltage in Simple DC Cir.
9			Ch 26. The Magnetic Field: Mag force, torque Ch 27. Sources of the Magnetic Field	No LAB, but Lecture
10			Exam 2: Ch 24, 25, 26, 27 included.	
			Lab 7	Lab 7. Kirchhoff's Circuit Laws
11		27	, ,	-
		29	Lab 8	Lab 8. Capacitors and RC Cir.
12	Nov	3	Ch 29. Alternating-Current Circuits	-
			Lab 9	Lab 9. Inductors and RL Cir.
13			Ch 30. Maxwell's Eq. and EM Waves	-
		12	,	No LAB, but Lecture
			refraction	
4.4		47	Ch 32. Optical Images: mirrors, lenses Ch 33. Interference and Diffraction:	
14		17 10	Lab 11	Lab 11. Rays of Light
4.5				Lau I I. Rays OI LIGHT
15			Exam 3: Ch 28, 29, 30, 31, 32, 33 included Review	
16	Dec	1	Final Exam, all chapters included.	

Changes to this syllabus could be made at the discretion of the instructor and will be announced in class and on D2L.

Institutional Policies and Guidelines

Grade Appeal Process: Concerns about the accuracy of grades should first be discussed with the instructor. A request for a change of grade is a formal request and must be made within six months of the grade assignment. Directions for filing an appeal can be found in the student handbook https://www.com.edu/student-services/student-handbook.html. An appeal will not be considered because of general dissatisfaction with a grade, penalty, or outcome of a course. Disagreement with the instructor's professional judgment of the quality of the student's work and performance is also not an admissible basis for a grade appeal.

Academic Success & Support Services: College of the Mainland is committed to providing students the necessary support and tools for success in their college careers. Support is offered through our Tutoring Services, Library, Counseling, and through Student Services. Please discuss any concerns with your faculty or an advisor.

ADA Statement: Any student with a documented disability needing academic accommodation is requested to contact: Kimberly Lachney, Student Accessibility Services Coordinator

Phone: 409-933-8919

Email: AccessibilityServices@com.edu

Location: COM Doyle Family Administration Building, Student Success Center

Textbook Purchasing Statement: A student attending College of the Mainland is not under any obligation to purchase a textbook from the college-affiliated bookstore. The same textbook may also be available from an independent retailer, including an online retailer.

Withdrawal Policy: Students may withdraw from this course for any reason prior to the last eligible day for a "W" grade. Before withdrawing students should speak with the instructor and consult an advisor. Students are permitted to withdraw only six times during their college career by state law. The last date to withdraw from the 1st 8-week session is October 1. The last date to withdraw from the 16-week session is November 14. The last date to withdraw for the 2nd 8-week session is November 25.

FN Grading: The FN grade is issued in cases of *failure due to a lack of attendance*, as determined by the instructor. The FN grade may be issued for cases in which the student ceases or fails to attend class, submit assignments, or participate in required capacities, and for which the student has failed to withdraw. The issuing of the FN grade is at the discretion of the instructor. The last date of attendance should be documented for submission of an FN grade.

Early Alert Program: The Student Success Center at College of the Mainland has implemented an Early Alert Program because student success and retention are very important to us. I have been asked to refer students to the program throughout the semester if they are having difficulty completing assignments or have poor attendance. If you are referred to the Early Alert Program you will be contacted by someone in the Student Success Center who will schedule a meeting with you to see what assistance they can offer in order for you to meet your academic goals.

Resources to Help with Stress:

If you are experiencing stress or anxiety about your daily living needs including food, housing or just feel you could benefit from free resources to help you through a difficult time, please click here https://www.com.edu/community-resource-center/. College of the Mainland has partnered with free community resources to help you stay on track with your schoolwork, by addressing life issues that get in the way of doing your best in school. All services are private and confidential. You may also contact the Dean of Students office at deanofstudents@com.edu or communityresources@com.edu.

Nondiscrimination Statement:

The College District prohibits discrimination, including harassment, against any individual on the basis of race, color, religion, national origin, age, veteran status, disability, sex, sexual orientation, gender (including gender identity and gender expression), or any other basis prohibited by law. Retaliation against anyone involved in the complaint process is a violation of College District policy.
